MEDACCR project

Overview

The MEDACCR project is promoted by the European Commission in the scheme of the Erasmus+ programme. It will run from October 2017 until October 2020.

Its wider objective is to set up and implement an on-line Quality Assurance (QA) system and an accreditation system of **Engineering** Study Programmes (ESPs) in Algeria, Jordan and Tunisia, consistent with the EUR-ACE Framework Standards and Guidelines (EAFSG).

Specific Project Objectives

- To promote the design of student-centred ESPs focused on the definition of learning outcomes consistent with the programme outcomes shared at European level.
- To bring the internal QA of ESPs into line with the Standards and Guidelines for QA in the European Higher Education Area (ESG).
- To promote transparency and comparability of ESPs through an on-line documentation of their QA.
- To identify/create national centres/agencies for the EUR-ACE accreditation and to promote international recognition of ESPs.
- To sustain the project by agreements with Ministries of Higher Education of the Partner Countries for the recognition / recommendation of EUR-ACE accreditation at national level.
- To disseminate the project results by involvement of the academic and administrative staff of the Partner Countries Universities.
